

Lönestatistik 2017

Bygger på insamling av löner för medlemmar som ej omfattas av någon partsgemensam lönestatistik och som har en ALS-kod (Arbetsgruppering för lönestatistik)

Statistikens omfattning och uppbyggnad

De ca 65 000 uppgifter, som denna statistik grundar sig på, hämtades ur Unionens medlemsregister 2017-12-31 och har samlats in från enskilda medlemmar och klubbar.

Deltidsanställdas löner har räknats upp till heltidslöner med hjälp av inrapporterad deltidsprocent.

Lönebegreppet i tabellen bygger på total månadslön dvs summan av fast kontant lön och ett genomsnitt av utgående provisioner, bonus, premielön etc samt förmånsvärden av bil, lunch mm enligt Skatteverkets normer.

Löneuppgifterna avser år 2017 efter avslutad förhandling.

Median- och percentillönerna i tabellerna definieras på följande sätt:

20 % av personerna i gruppen har lägre lön än 20:e percentilen och 80 % har högre lön.

50 % av personerna i gruppen har lägre lön än medianen och 50 % har högre lön.

80 % av personerna i gruppen har lägre lön än 80:e percentilen och 20 % har högre lön.

Det fordras minst 5 personer i gruppen för att median ska ha beräknats. Percentiler har beräknats om gruppen innehåller minst 10 personer.

Lönatabellen är indelad efter det grupperingssystem för arbetsuppgifter som kallas ALS (Arbetsgruppering för lönestatistik). Klassificeringen enligt ALS har gjorts i klubbar, av medlemmar, där klubb saknats eller av anställda. Systemet innehåller 24 verksamhetsområden (de två första siffrorna i den treställiga koden) och 6 svårighetsnivåer (3:e siffran i koden), där nivå 1 motsvarar de enklaste arbetsuppgifterna och nivå 6 de svåraste inom verksamhetsområdet. För mer information om systemet hänvisas till Unionens hemsida unionen.se och följande sidor, där en förkortad version presenteras.

Lönestatistikens användning
